

Enfuselle® Optimal Skin Nutrition

Developed by Shaklee Nutritionists

**Enfuselle®, the revolutionary breakthrough in skin care.
Protected by eight patents.
Clinically proven and exclusive to Shaklee.**

Behind the science of skin care

While a healthy diet supported by dietary supplements can help keep your skin healthy and younger looking, it takes even more to protect skin from the outside world--it takes the very best "skin" vitamins, minerals, and nutrients, highly effective when incorporated into anti-aging skin care products.

Skin care ahead of its time

Recognized as pioneers in the development of nutritional supplementation for almost a half-century, Shaklee scientists focused their scientific expertise on investigating the causes of aging. They found that accelerated aging occurs, in part, because of increased exposure to the sun and environmental pollutants, which creates free radicals on the skin. This in turn takes its toll on the skin, the body's largest organ, by causing effects that you may not even see for a long time.

A concept borne out of research a decade ago led to the discovery and development of Vital Repair+® Complex, a patented comprehensive combination of proprietary ingredients that you would expect to find in a dietary supplement. This exclusive complex is the heart of the Enfuselle skin care line and remains your best defense against the chain of damage caused by time and environmental assaults. A revolutionary breakthrough in skin care.

Skin infusing nutrition – the name tells the story

Enfuselle infuses skin cells to combat aging assaults. The exclusive antioxidant formula, Vital Repair+ Complex, systematically breaks each link in the chain of free radical damage with seven nutrients for the skin, all of which work in synergy, providing greater benefit together than when used separately. It's a formula so unique that it holds three patents.

No other skin care line offers better support. Many others include nutritional ingredients, but Enfuselle comprehensively blocks all the free radical reactions that take place on the skin, reactions that can lead to the premature signs of visible aging.

And, because Shaklee takes a new approach to skin nutrition, Enfuselle never includes harsh ingredients that others do to achieve short-term results, but that may not lead to a lifetime of beautiful, healthy skin. With Shaklee and Enfuselle, you feel your best, and look your best now-- and for life.

Shaklee is the difference, and we have the proof:

Shaklee has invested more than \$1 million in research, development, and clinical studies on the products that make up the Enfuselle skin care system.

Eight patents have been awarded to the Enfuselle line, so it's both recognized and safeguarded for its unique and effective formulations. Only a few skin care companies have any patents, and even fewer have as many as eight.

Enfuselle products have been proven safe and effective in laboratory and human testing. One test included 2,000 people worldwide. Test subjects were selected due to their skin sensitivities. Test results were so remarkable that they exceeded Shaklee expectations and those of the independent laboratories that conducted the testing.

Plus, all Enfuselle formulas are:

- Clinically formulated
- Botanically-based
- pH balanced
- Hypoallergenic
- Non-comedogenic (won't clog pores)
- Dermatologists tested
- Never tested on animals
- Contains no animal-derived ingredients
- Free of occlusive oils, soap, and dyes

It's as simple as this:

Shaklee: A leader in Nutrition for 50 years.

Enfuselle: Developed by Shaklee scientists as nutrition for the skin.

The result: The best nutritional skin care currently available.

Yet, it doesn't stop there:

Our Minerelles™ cosmetic line utilizes natural mineral pigments, and includes Vital Repair+ Complex, boosting the skin care benefits from your beautifying regimen.

The ProSanté® hair care system is patented and was also developed by our nutritional scientists. This system includes the Scalp Health Complex, a unique, optimal combination of no less than 10 scalp-nourishing vitamins, minerals, and herbs to promote an environment for healthy hair growth.

The Shaklee Wellness Lifestyle

Your skin is a mirror of your health, and keeping your body healthy with proper diet, Shaklee dietary supplements, and exercise is a great start. But there is more when it comes to the health of your skin and hair. Optimal skin and hair health can only be achieved through proper protection from the sun and environmental assaults. Shaklee provides the answer to overall Wellness. Starting on the inside with Shaklee nutritional supplements. And for the outside with Enfuselle skin care, Minerelles cosmetics, and ProSanté hair care.

The Opportunity that awaits you for your own Shaklee wellness lifestyle is possible. **Start living it today. You'll feel better – and look better – with a lifestyle and earning opportunity you have only dreamed of.**
